

STMicroelectronics

Consumer Electronics Show
January 6, 2014 – Las Vegas

Bob Krysiak

Executive Vice President
President, Americas Region

Agenda 2

- 4:00 pm Introduction
- 4:05 pm Strategy, markets and business
- 4:45 pm Q&A
- 5:00-6:00 pm Demo Tour

Forward Looking Statement

Some of the statements contained in this release that are not historical facts are statements of future expectations and other forward-looking statements (within the meaning of Section 27A of the Securities Act of 1933 or Section 21E of the Securities Exchange Act of 1934, each as amended) that are based on management's current views and assumptions, and are conditioned upon and also involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those anticipated by such statements, due to, among other factors:

- *uncertain macro-economic and industry trends;*
- *customer demand and acceptance for the products which we design, manufacture and sell;*
- *unanticipated events or circumstances which may either impact our ability to execute the planned reductions in our net operating expenses and / or meet the objectives of our R&D Programs which benefit from public funding; •future events or circumstances which may require us to reassess our current plans concerning the break up and wind down of our ST-Ericsson joint venture;*
- *the loading and the manufacturing performances of our production facilities;*
- *the functionalities and performance of our IT systems, which support our critical operational activities including manufacturing, finance and sales;*
- *variations in the foreign exchange markets and, more particularly, in the rate of the U.S. dollar exchange rate as compared to the Euro and the other major currencies we use for our operations;*
- *the impact of intellectual property ("IP") claims by our competitors or other third parties, and our ability to obtain required licenses on reasonable terms and conditions;*
- *restructuring charges and associated cost savings that differ in amount or timing from our estimates;*
- *changes in our overall tax position as a result of changes in tax laws, the outcome of tax audits or changes in international tax treaties which may impact our results of operations as well as our ability to accurately estimate tax credits, benefits, deductions and provisions and to realize deferred tax assets;*
- *the outcome of ongoing litigation as well as the impact of any new litigation to which we may become a defendant;*
- *natural events such as severe weather, earthquakes, tsunami, volcano eruptions or other acts of nature, health risks and epidemics in locations where we, our customers or our suppliers operate;*
- *changes in economic, social, political or infrastructure conditions in the locations where we, our customers or our suppliers operate including as a result of macro-economic or regional events, military conflict, social unrest or terrorist activities;*
- *availability and costs of raw materials, utilities, third-party manufacturing services, or other supplies required by our operations;*

Such forward-looking statements are subject to various risks and uncertainties, which may cause actual results and performance of our business to differ materially and adversely from the forward-looking statements. Certain forward-looking statements can be identified by the use of forward looking terminology, such as "believes," "expects," "may," "are expected to," "should," "would be," "seeks" or "anticipates" or similar expressions or the negative thereof or other variations thereof or comparable terminology, or by discussions of strategy, plans or intentions.

Some of these risk factors are set forth and are discussed in more detail in "Item 3. Key Information — Risk Factors" included in our Annual Report on Form 20-F for the year ended December 31, 2012, as filed with the SEC on March 4, 2013. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in this release as anticipated, believed or expected. We do not intend, and do not assume any obligation, to update any industry information or forward-looking statements set forth in this release to reflect subsequent events or circumstances.

ST Leader in Set-Top-Box

7

Long-standing market leadership in Set-Top Box

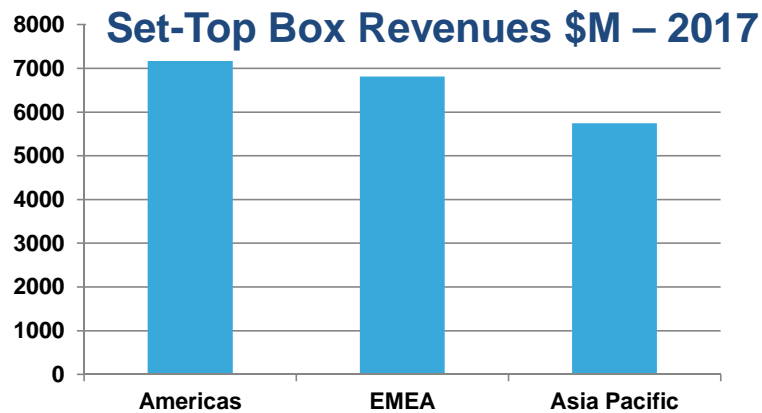

- **Market leadership** in Set-Top-Box through focused portfolio
- Complete portfolio for the **US cable market**
- Leading the transition to the **HEVC** and **Ultra HD** Client/Server and Home Gateway
- Established **worldwide ecosystem** of partners and 3rd parties
 - Middleware vendors and integrators
 - Content management and security solutions
 - Services and application provider
- **World-class IP portfolio**, enabling Ultra HD multi-screen video processing & seamless home connectivity

#2	Worldwide
>1 B	MPEG Decoders cumulative shipments

TAM Distribution by geography

Americas

- High value market
- \$1.6B TAM in 2013 for ST

HD/UHD and Gateway/Client

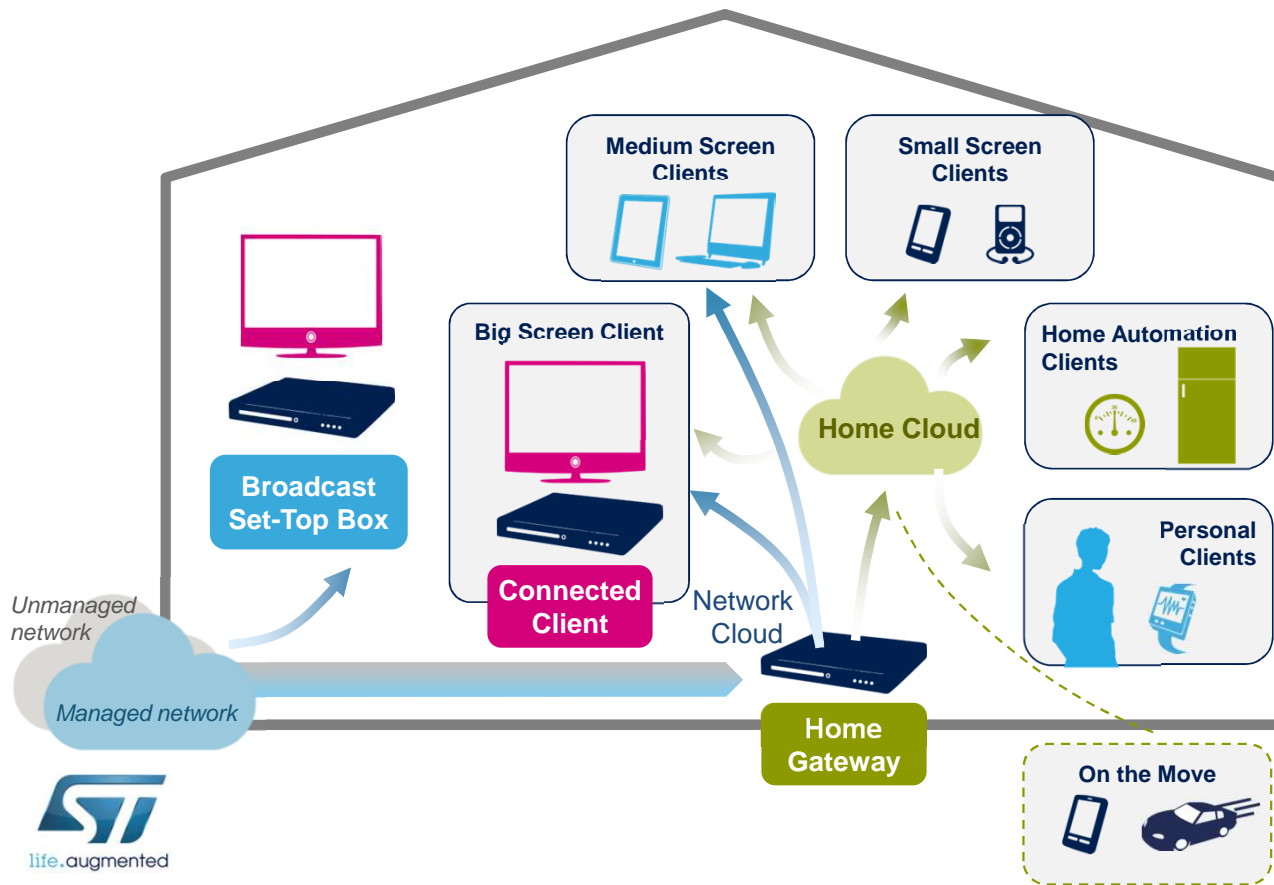

HD/UHD

- Fast-growing segment
- HEVC deployment

Transition to Client & Server models happening now

From Broadcast Set-Top Box to Cloud-Connected Clients Home Gateways to Manage Home Clouds with Multiple Clients

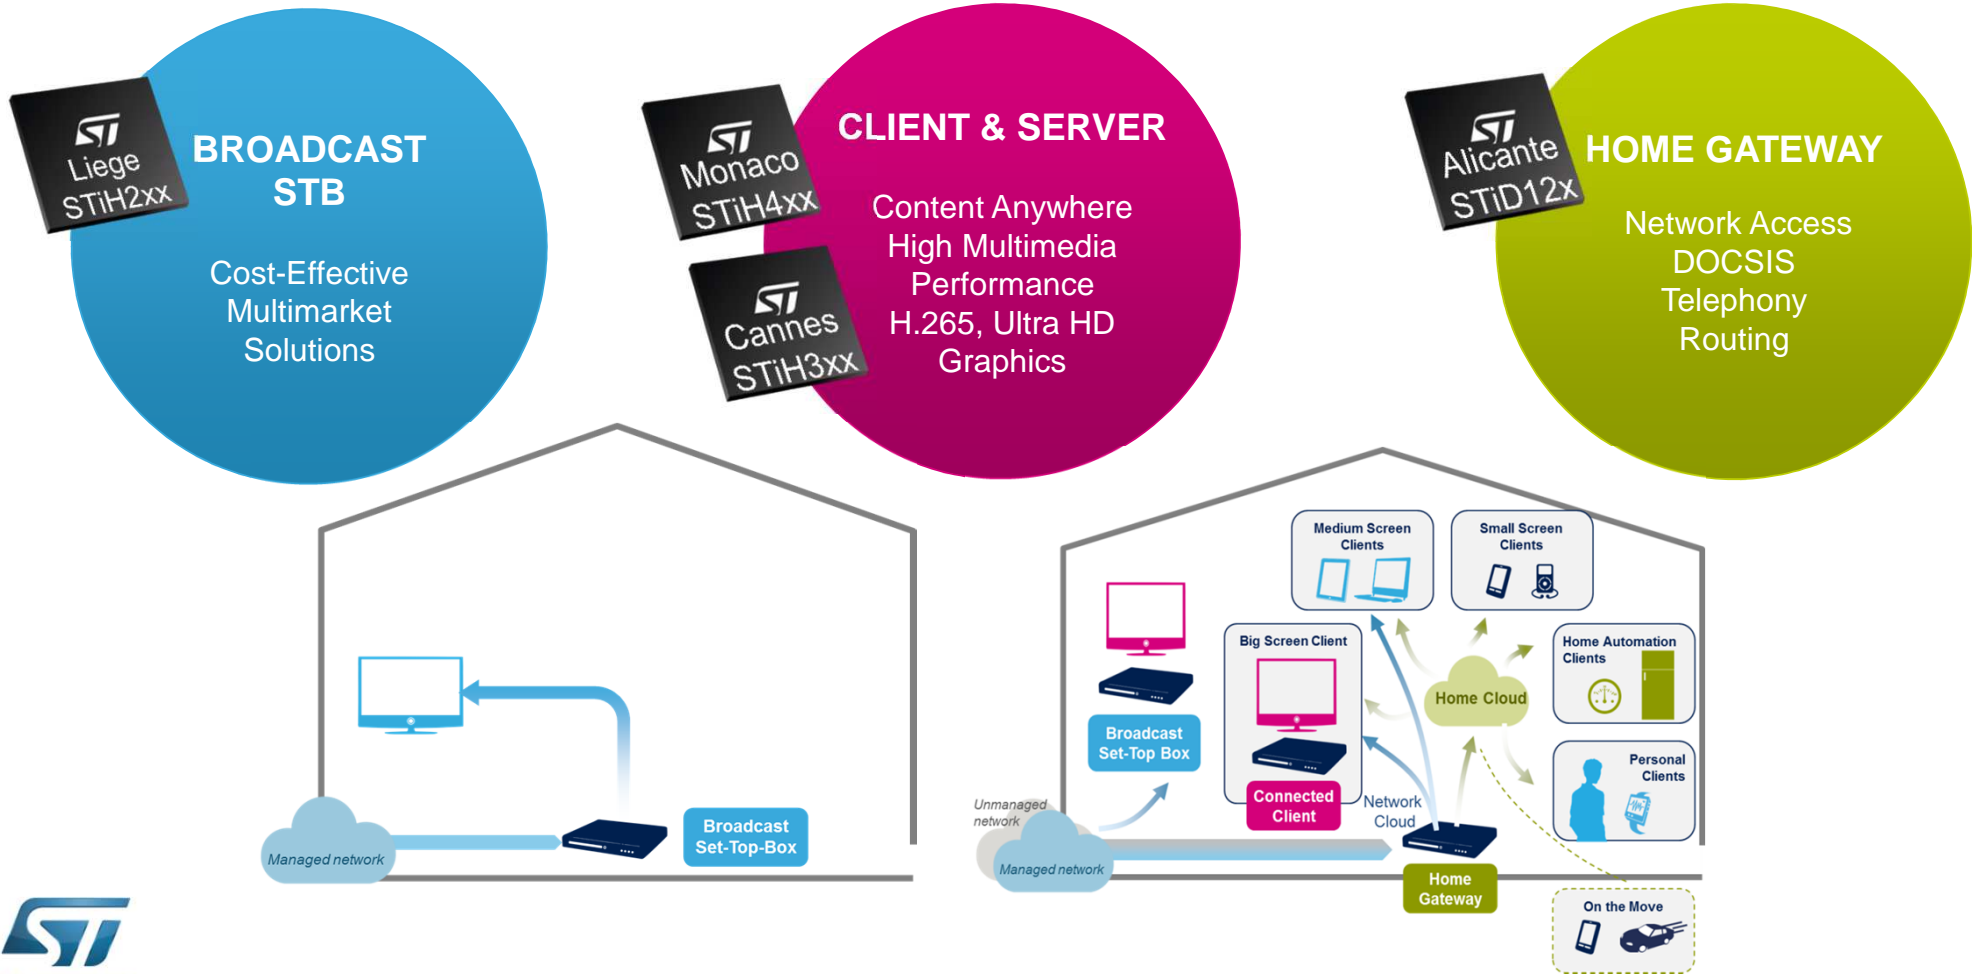

Any client benefits from managed network services

New applications across multiple clients

QoS thanks to Multimedia Gateway acting as a cloud proxy

Home-services continuity for mobile clients

Complete Product Portfolio

Enabling large-scale Ultra HD deployments

Bringing an exciting new experience to the consumer

ULTRAHD

HEVC

H.265 - HIGH EFFICIENCY VIDEO CODING

Complete HEVC/H.265 Line up for Client & Servers

14

Benefits

- 4K/UHD HEVC/H.265 to capture emerging 4K VOD and Catch-Up TV services
- Simultaneous graphics rendering with high-performance GPU
- Graphics engines optimized for smooth-swipe User Interface
- HTML5 Advanced UI for seamless experience across all screens

- Multiple middleware partners: Cisco Technology, Wyplay, SoftAtHome
- Mature SW Development Kit (SDK2)

HEVC

H.265 - HIGH EFFICIENCY VIDEO CODING

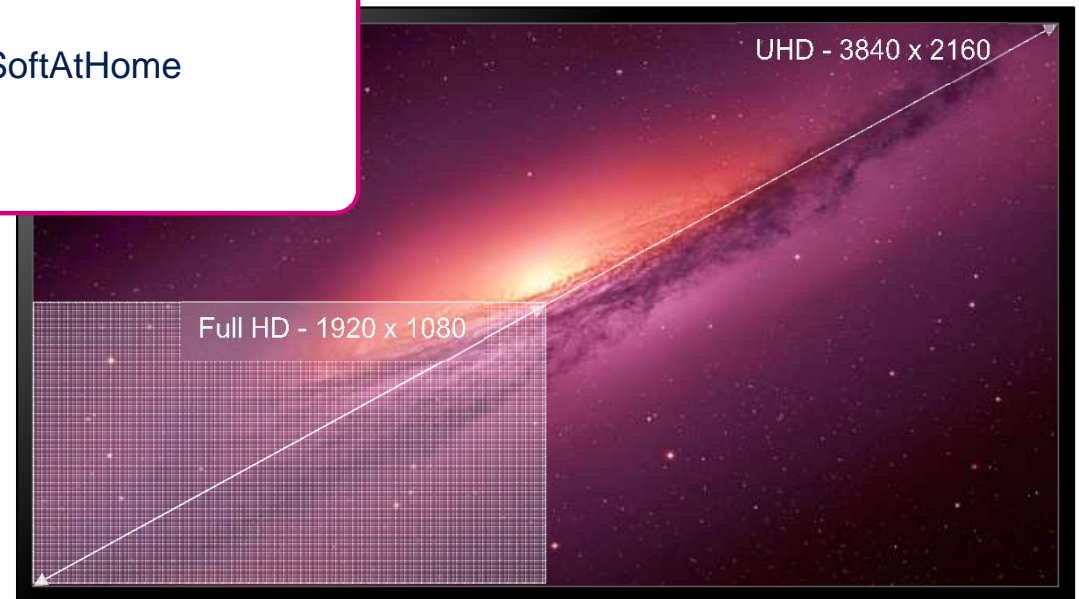

ULTRAHD

UHD - 3840 x 2160

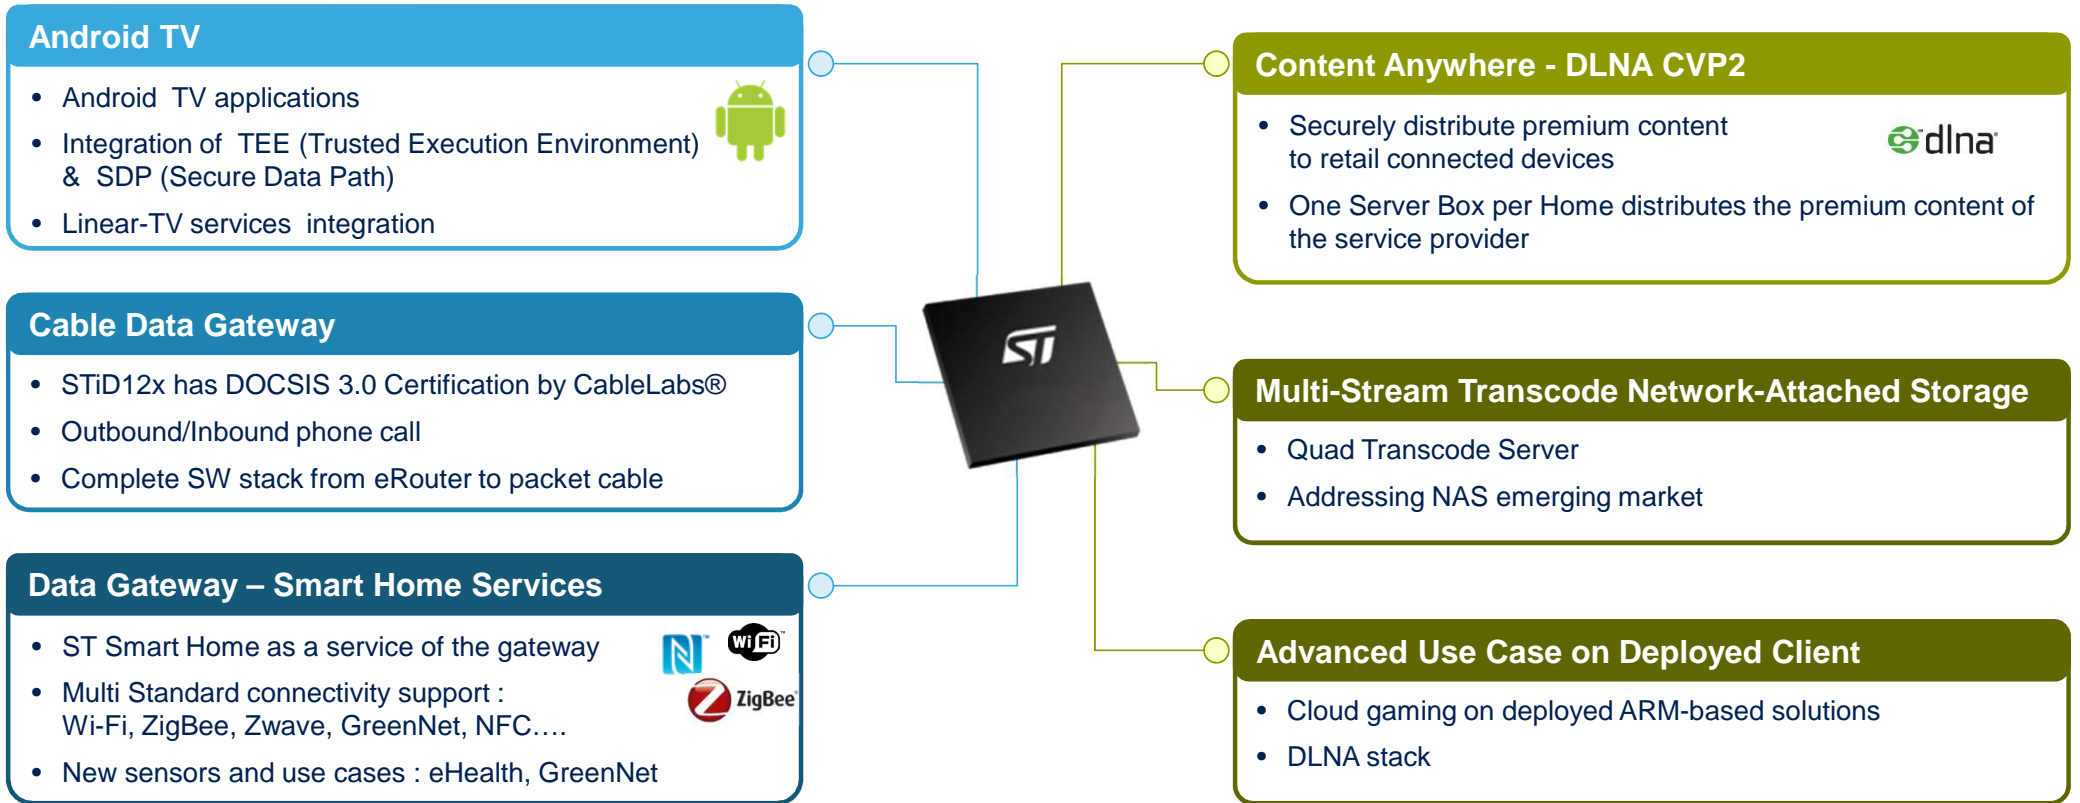

Full HD - 1920 x 1080

Powering the Cloud in the Home

Complete Solution for US Cable Set-Top Box

Towards Tomorrow's Digital Home

STi8K™ Architecture

- ARM® v8 Cortex™-A53/A57 64-bit processor technology
- FD-SOI 28nm process technology for the best power-to-performance ratio

+

CLIENT & SERVER

- 4K Ultra HD video at 60 frames per second
- 10-bit High Efficiency Video Coding (HEVC)
- 2D/3D graphics, native 4K resolution & OpenGL 3.0
- Smooth-swipe user interface
- HDMI 2.0 / HDCP2 for advanced secure connectivity

True Ultra HD experience

+

HOME GATEWAY

- DOCSIS 3.1 for uncompromised bandwidth
- Wire speed routing capabilities

Complete Range of Sensor-Hub Solutions

Family of flexible, operating-system-agnostic sensor-hub solutions for always-on operation

- ST is leading the evolution of the Digital Home
 - Optimized solutions for broadcast Set-Top-Box market
 - Complete portfolio for the evolving US cable market
 - Strong customer traction on recently launched product families
 - Best-in-class Ultra HD and HEVC solutions available today
 - Evolutionary STi8K architecture setting the foundation for tomorrow's Digital Home
- ST is already a leader in the Internet of Things
 - Complete product portfolio including sensors, microcontrollers, connectivity, & smart energy management
 - Expertise in digital-security technologies & understanding of the sensor-to-cloud value chain
 - Strongly engaged with leading players

Q&A
