PRESSEINFORMATION

STMicroelectronics Reports Preliminary First Quarter Results

Geneva, April 3, 2003 - STMicroelectronics (NYSE: STM) reported that based upon
preliminary data, net revenues for its 2003 first quarter, ended March 29, 2003,
are expected to be \$1,618 million, just slightly below the low end of its
guidance range of \$1,620 million, and gross margin should be around 35%, below
the bottom of the previous guidance range of 36%.

The Company stated today that it experienced order push-outs in March
relating to a number of its end markets, with the notable exception of digital
consumer, and that it expects the majority of the affected products to be
shipped in the 2003 second quarter. Gross margin for the 2003 first quarter was
penalized by greater-than-expected pricing pressure and the stronger Euro. ST
provided 2003 first quarter revenue guidance and gross margin guidance in its
2002 fourth quarter/year end earnings release of January 22, 2003.

While detailed first quarter financial information is not available at this
early date, the Company believes that the absolute amount of its operating
expenses will be approximately flat with 2002 fourth quarter levels despite the

impact of the strengthened rate of the Euro vs. the US dollar. In addition, as reported in the 20F, the Company incurred in the first quarter of 2003 a non-operating one-time charge of \$8.4 million as a result of the March 6, 2003 repurchase of approximately \$429 million of the Company's Zero-Coupon Convertible Notes due 2010, but expects interest expense savings of approximately \$6 million in the remainder of 2003 to reduce the negative impact to about \$3 million for the full year. The Bond repurchase is expected to reduce ST's interest expense by approximately \$10 million in 2004.

ST will report its full first quarter 2003 earnings after the close of the New York Stock Exchange on Wednesday, April 23, 2003 and hold its conference call on Thursday, April 24, 2003.
